

CAPACITY TO DELIVER

CAPACITY TO DELIVER

'THE ABILITY TO SUPPLY AND SUSTAIN THE NECESSARY PROJECT PERSONNEL AND SUBCONTRACTORS TO COMPLETE PROJECTS ON TIME AND WITHIN BUDGET'

Ri-con Contractors specialise in providing quality staff and subcontractors under adverse economic conditions and in all geographical environments. Recent project experience has demonstrated that the Company has the ability to complete projects on time and within budget.

Over the coming years, we anticipate that with changes in the economic situation and a slowing in the construction industry, trades people will become more readily available. Competition in the marketplace, building costs and wage rates will have a tendency to slow allowing for better pricing and greater choice of subcontract companies.

'SUSTAINING THE NECESSARY PLANT, EQUIPMENT AND MATERIALS FOR PROJECTS'

Our Company has a proven track record in the timely completion of difficult development projects, especially in remote and challenging regions.

The quality of the outcomes is the result of our:

- expertise in remote area construction
- purchasing experience and:
- knowledge of logistical planning and delivery for these remote regions.

Over many years the Company has established relationships with local and national companies who are familiar and experienced with the specific requirements for these remote areas and have subsequently developed work methods and supply chains to overcome the many difficulties.

Ri-con uses a sister company, Ri-con Plant and Equipment Hire, to maintain a consistent supply of quality plant and equipment for all its projects. Ri-con Plant and Equipment Hire supplies and maintains all vehicles and equipment that are necessary for the successful completion of any project.

'CONTROLLING THE IMPACT OF MATERIAL PRICE RISES FOR THE DURATION OF CONTRACTS'

Ri-con uses a select number of suppliers for the materials and equipment required on each construction project. These suppliers have the ability to commit to negotiated prices at the beginning of a project and therefore the impact of price fluctuations throughout the project should not arise.

In the event that suppliers are unable to supply specific items in the course of the project, alternative suppliers and/or alternative materials are anticipated and sourced.
