

# EXPERIENCE IN PROJECT DELIVERY

## EXPERIENCE IN PROJECT DELIVERY CONTINUED

### EL QUESTRO RESORT – EMMA GORGE, CLIENT: GPT, 2005

As the initial builders of the El Questro Homestead, Station and Emma Gorge Resort, Ri-con was immediately engaged to undertake repairs and maintenance work following the March 2005 cyclone damage to the resort and surrounding areas.

This work included :

- Rebuilding most of the permanent ensuite tent cabins
- Re-installing concrete swimming pool
- Redirecting the flow of the river with major civil works and building a 15m bridge
- An upgrade of all the cold and hot water (gas boosted) reticulation

With such a remote location repairs required careful and extensive planning and logistics as El Questro is one of the Kimberley regions major tourism draw cards. A quick turnaround was an essential component of the project brief.

#### SUMMARY:

Contract value: \$4.5m

Duration: 40 weeks
