

ENVIRONMENTAL MANAGEMENT

ENVIRONMENTAL MANAGEMENT

AS RI-CON CONTRACTORS REGULARLY WORK IN THE ENVIRONMENTALLY-SENSITIVE REMOTE REGIONS OF AUSTRALIA, RECOGNITION OF THE EFFECTS OF ITS WORK ON THE ENVIRONMENT IS UPPERMOST IN THE MINDS OF MANAGEMENT AND STAFF.

Accordingly, the Company's activities are planned and conducted to minimise and, where possible, avoid adverse effects on the natural environment, thereby protecting it for future generations.

To this end the Company commits to complying with the relevant environmental legislation of the States within which it works and educates staff and contractors on environmental issues and the effect their work has on the environment.

This environmental commitment is demonstrated by:

- The inclusion of environmental aspects in planning processes
- Consideration of the environmental outcomes of our work in the same way as quality, cost and safety are considered
- Protection of the natural environment, preservation of biodiversity, prevention of pollution, and minimisation of waste
- Monitoring and reviewing environmental performance at all levels of management, and promotion of environmental awareness to clients, staff, subcontractors and other stakeholders.

These commitments have been demonstrated in the Company's work on the islands within the Great Barrier Reef Marine Park. We have been required to operate within tight licence conditions and to challenging project schedules.

In summary, Ri-con Contractors will work closely with its clients, relevant authorities, and other interest groups to continue its commitment to sustainable design and environmentally aware methods of construction.
