

EXPERIENCE IN PROJECT DELIVERY

EXPERIENCE IN PROJECT DELIVERY

BACKGROUND

Our Company has a track record for delivering difficult development projects both on time and to budget, no matter how remote or challenging the location or project. We are recognised throughout Australia as a leading contractor with the ability to handle fully documented design and construct projects, specialising in commercial construction in remote areas including the Kimberley and Pilbara in Western Australia and the islands off the coast of Queensland.

RI-CON'S SUCCESS IS BASED ON:

- Access to a large pool of subcontractors, tradesmen and labourers providing the flexibility which, coupled with extraordinary logistical support, can instantly provide highly qualified teams with a culture of achieving results in remote areas. The teams are supported by a management group which provides immediate action from planning to completion.
- Use of a Quality Management System certified to ISO 9001:2000, a certified Occupational Health and Safety Management System complying with the requirements of AS/NZS 4801: 2001, and relevant Building Licences, as required for accreditation with Governments in Queensland, Northern Territory and Western Australia.
- Prequalification with the governments of Western Australia, Northern Territory, and Queensland.

Ri-con's web site www.ricon.net.au provides more information regarding its experience in delivering exceptionally planned construction projects meeting all client requirements.
